

**Workshop: The Future of Facility Cleaning: Green Your Budget and Your Building  
with Process Cleaning and Engineered Water. (6-18-13) 9:00 – 3:00 pm**

This session is a more in-depth extension of the previous session conducted at MASSbuys in May. It will include new information about an “approved products list” on the FAC59 Statewide Contract and guidance on how to switch to greener products. Hands-on demonstrations on three cleaning equipment models that significantly reduce the need for chemicals will also be featured. These new technologies can be used for floors, walls, bathrooms, classrooms and more! Hear how this equipment can save money while improving health conditions for your staff and building occupants. Laboratory representatives who have performed the testing on these technologies will be presenting, as well as some FAC59 vendors that offer the equipment. The equipment can help to lower labor cost, save energy and reduce the number of chemicals facilities use to clean. It serves to improve indoor air quality as well as improve conditions for worker health. Attendees will have an opportunity to schedule a free demo at their facility!
